

50/50 SIDEWALK REPLACEMENT PROGRAM

Department of Public Works

Dear Applicant:

Through the 50/50 sidewalk replacement program, the Village and resident equally share the cost of replacing sidewalk within the right-of-way. The program is conducted on a first come-first served basis.

Application: Resident must fill out the application and return it to The Public Works Building located at 1051 S. Hammerschmidt Ave or fax to (630) 620-5982 as soon as possible. Once enough applications are compiled, Village staff will inspect the sidewalk and send a cost estimate to the applicant.

Payment: Residents will be sent a quote and a deadline for payment. The cost of sidewalk is approximately \$170.75 per 5' x 5' square. Therefore, cost paid by the resident would be approximately \$85.37 per sidewalk square.

Work: A contractor working for the Village will remove and replace the existing sidewalk in accordance with Village specifications. The adjacent landscaped area will be restored with topsoil and grass seed. The contractor is responsible for the initial watering of the seed; residents will be responsible for subsequent watering to establish the turf.

Parameters of the Program:

- 1) Regardless of its current size or configuration, each sidewalk square will be replaced in accordance with current Village standards and policies.
- 2) If the sidewalk to be replaced is across a driveway, the contractor will need to sawcut the existing driveway to allow for the placement of concrete forms. Please understand that this will result in a patch on the property owner's side of the driveway. It is a possibility that the driveway apron might require replacement in order for the sidewalk to be installed properly. If this is the case, the shared cost of replacing the apron will be included in the applicant's cost estimate. **Be sure to indicate if the sidewalk crosses through a driveway apron when submitting an application.**
- 3) Concrete requires 5 days to harden to a point where it can support the weight of a vehicle without long term damage. If sidewalk is replaced across the driveway, **vehicle access will be prohibited during that 5-day period.** You will be provided parking passes from Public Works one working day before work proceeds and your access will be restricted. Please call the Police Department non-emergency number at (630) 873-4400 to inform them of any vehicles parked at your residence without parking passes, such as work vehicles, visitors, etc.

Note: By signing and returning the application to the Public Works Department you are declaring that you are aware of and understand the above items. If you have any questions, please call Public Works at (630) 620-5740.
