Dear Resident/Business Owner,

A manhole located near your home is scheduled to be repaired as part of the 2023 Manhole Rehabilitation Program. Starting the week of July 10, 2023 (weather permitting) and over the next 4 to 6 weeks, Structured Solutions, L.L.C. of Union City, Indiana will be repairing sanitary sewer manholes located within the Village right-of-way or utility easement.

The 2023 program includes approximately 50 manholes at various locations throughout the Village. These manholes were previously inspected and found to require some type of repair. The work will address numerous deficiencies such as deteriorated surfaces, cracks that allow the inflow of groundwater/stormwater, and deterioration at the bottom of the manhole that impairs the proper flow of sewage through the structure. Some manholes may involve multiple visits depending upon the type of repair.

The work should not impact your sanitary service. However, equipment and personnel will be in the vicinity and temporary lane reductions may be established. If impacts are more extensive, you may be contacted by Village staff or the Contractor.

For additional details about the Manhole Rehabilitation Program, including location maps, please visit www.villageoflombard.org/manholerehab.

Ray Schwab, Civil Engineer II, of the Public Works Department will oversee the project. If you have any questions or concerns, he can be reached at publicworks@villageoflombard.org or (630) 620-5740.

Regards,

*Village of Lombard
